ui produs decorativ, putem descoperi acum eleganța la un
ctul sau discret mătăsos-perlat, asemeni interiorului unei

pus în valoare de mâna iscusită a meșterului, prin modul de șpăcluire.
Unicitatea acestei decorațiuni este îmbogățită și de lumină, care prin jocul

Capadecor Stucco Eleganza este o masă de șpaclu mătăsoasă, pe bază de dispersii, pentru decorarea cu stil a pereților interiori. Prin aplicarea acestui produs se obțin suprafețe cu aspect semilucios și efect metalizat. Un produs elegant, cu un luciu delicat, ușor de aplicat, asigurând rezultate perfecte.

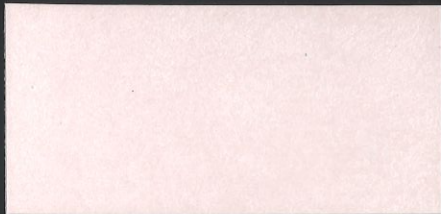

Strat de bază: Pe stratul suport pregătit în prealabil, se aplică cu rola grundul DecoGrund, alb sau în aceeași nuanță cu cea a stratului final și se netezește folosind fierul de glet venețian. La această etapă se vor evita urmele prea adânci care pot fi lăsate de fierul de glet.

Strat intermediar: Stucco Eleganza poate fi aplicat ud pe ud pe suprafețe mari, prin tehnica de șpăcluire, cu ajutorul unui fier de glet venețian. Se va evita uscarea forțată a suprafeței.

Strat final: Ultimul strat se aplică în același fel ca și stratul intermediar. Șpăcluirea stratului final se realizează de către un singur aplicator, pentru evitarea diferențelor de model.
